# vertemax

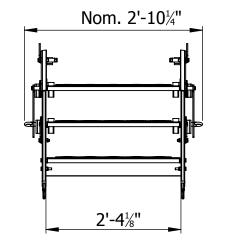

Name: Stairway 70 - 3 Steps Weight: 99 lbs Standard: EN 12811-1; COHS; OSHA; ANSI/ASSE Material: Galvanised Steel Dimensions: imperial

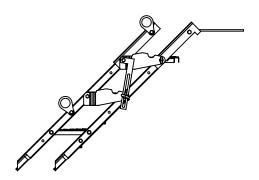

This Technical Document must always be used in conjunction with **vertemax's General Qualifications** -See below

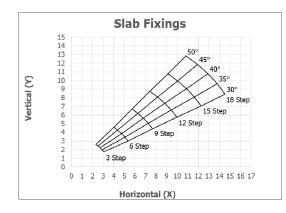

- 1. <u>Always</u> plan your work and installation
- 2. <u>Always</u> select the right equipment
- 3. Always regularly inspect your system

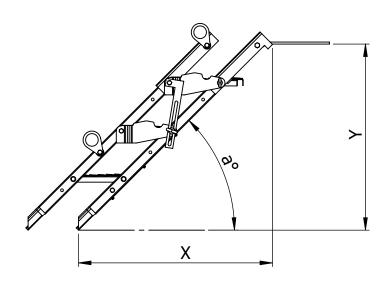

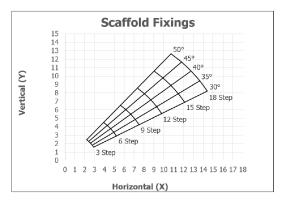

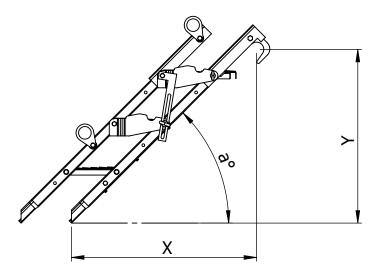

Slab Fixings			
Angle (a°)	Х	Y	
30	3' - 0 <sup>25</sup> / <sub>32</sub> "	1' - 8 <sup>7</sup> / <sub>8</sub> "	
35	2' - 10 <sup>7</sup> / <sub>8</sub> "	1' - 11 ³/4"	
40	2' - 8 <sup>23</sup> / <sub>32</sub> "	2' - 2 <sup>9</sup> / <sub>16</sub> "	
45	2' - 6 <sup>9</sup> / <sub>32</sub> "	2' - 5 <sup>1</sup> / <sub>16</sub> "	
50	2' - 3 <sup>5</sup> / <sub>8</sub> "	2' - 7 ³/ <sub>8</sub> "	

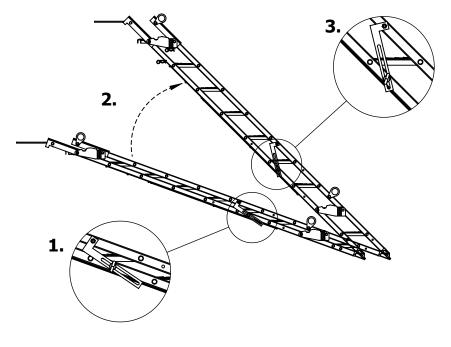

Scaffold Fixings			
Angle (a°)	Х	Y	
30	2' - 10 <sup>29</sup> / <sub>32</sub> "	1' - 6 ³/4"	
35	2' - 9 <sup>5</sup> / <sub>32</sub> "	1' - 9 <sup>11</sup> / <sub>16</sub> "	
40	2' - 7 <sup>5</sup> / <sub>32</sub> "	2' - 0 <sup>17</sup> / <sub>32</sub> "	
45	2' - 4 <sup>29</sup> / <sub>32</sub> "	2' - 3 1/8"	
50	2' - 2 <sup>13</sup> / <sub>32</sub> "	2' - 5 <sup>17</sup> / <sub>32</sub> "	

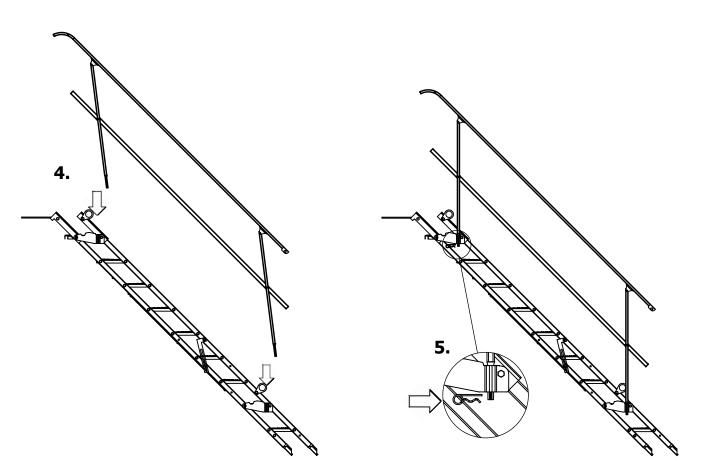

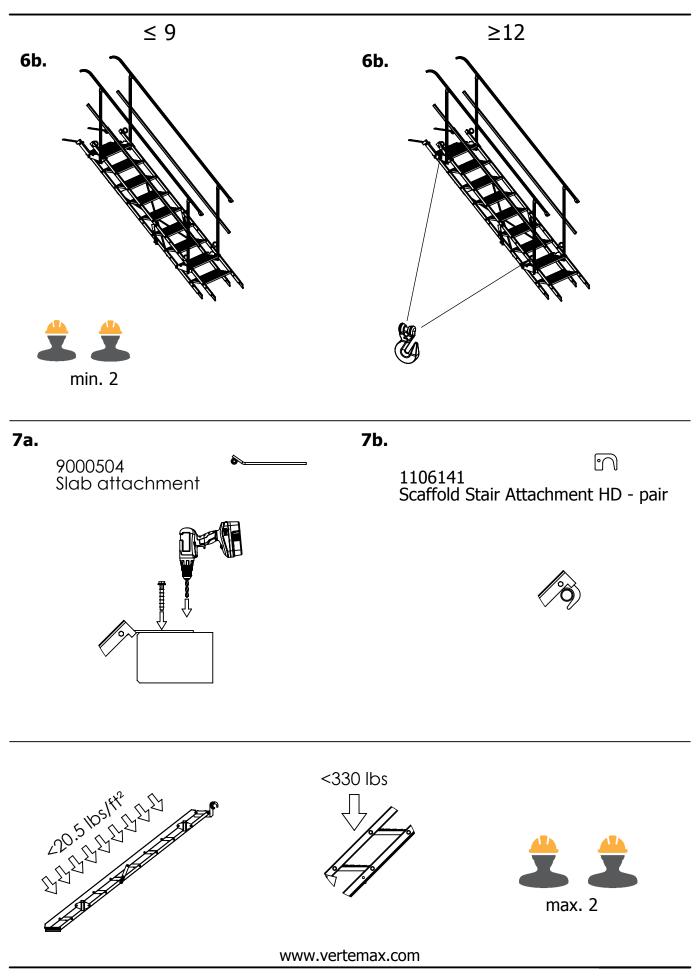

- 1. 2. 3.
- Loosen eye nuts Erect to desired angle Tighten eye nuts

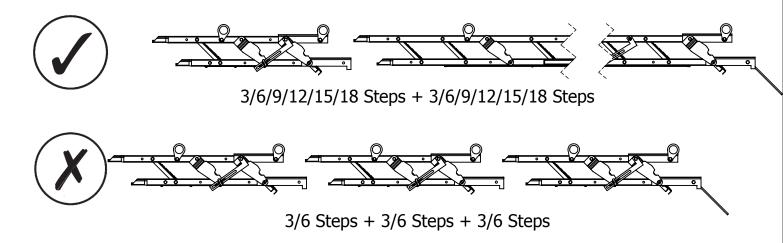

- Mount guard rails Fit retaining pin 4. 5.

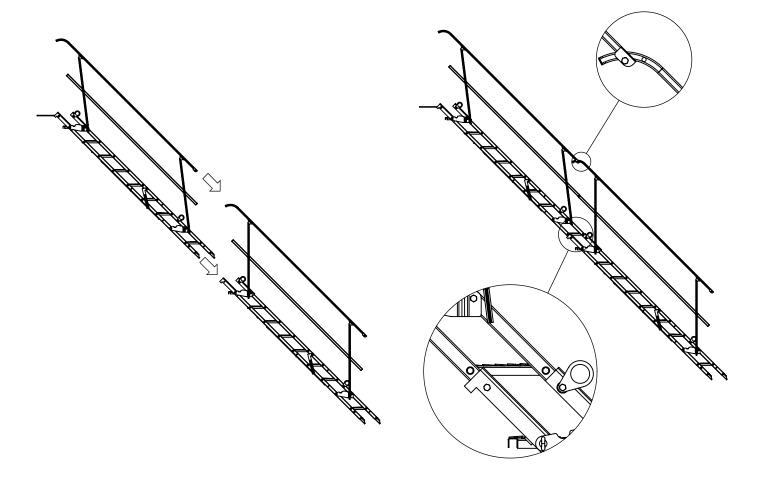

# vertemax

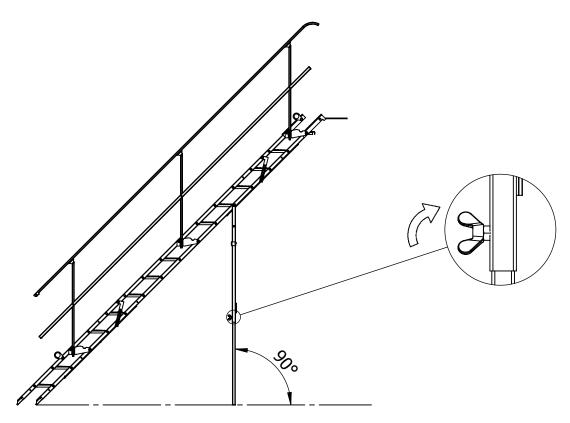

### Joining Stairways - Max. 21 Steps

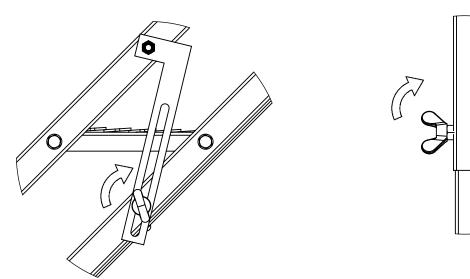

## Stairways support - 18 & 21 steps

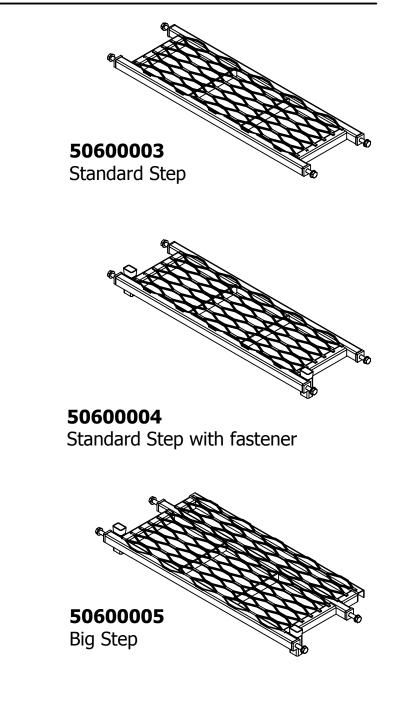

vertemax

5061009

Scaffold Stair Attachment HD

50600006

Stair Lock

For other parts and more information, please contact vertemax.

### **General Qualifications**

#### These General Qualifications are applicable to all vertemax products and must always be read in conjunction with each products Technical Documentation (TD).

#### General

- Always check general product condition before use
- If in doubt always ask by contacting a representative of vertemax
- Reject any damaged or rusty components
- vertemax products and systems provide temporary protection during construction activity.
- vertemax products are NOT tested or intended:
  - to withstand impact by any vehicle,
  - to support or provide control of the public,
  - for the containment of bulk materials.

#### Always Plan your works

- Take note of location, proximity to permanent and temporary hazard structures.
- Take note of dimensions, layout and access areas.
- Always identify both the fall hazard for the installer and the falling materials hazard for persons and property below.
- These identified hazards should also be considered on dismantling.
- vertemax strongly recommends seeking competent Work at Height advice if in any doubt about the installer's or other's safety.
- Note the component weight as given on the TD sheets and ensure suitable handling equipment is available.
- Ensure local site Risk Assessment / Method Statement detail is observed and followed.

<ul> <li>Material type and thickness, edge proximity, depth of embedment, and proximity to other fixings, all impact the strength of a fixing. Please refer to manufacturer's instructions for fixing guidance and limitation.</li> <li>The dimensions for installation and the load capacity should be confirmed by the fixing manufacturer for each application.</li> <li>Competent fixings advice should be sought if in any doubt.</li> <li>Fine mesh containment</li> <li>Note that the addition of any fine containment mesh (such as on barriers or safety nets) increases the wind load attracted to the supports.</li> <li>Technical advice must be sought before any such addition.</li> <li>Weather</li> <li>vertemax products and systems can be adversely impacted by significant wind speeds. Please note limitations on product TD and take any recommended remedial action. If in doubt, contact a vertemax representative.</li> <li>If in doubt, cease work, and use additional protection measures as required.</li> <li>All safety systems should be checked at least once every 7 days by a competent persor to ensure its continued integrity and that there are no signs of any potential failing.</li> <li>We recommend that these checks are recorded in a site log.</li> <li>Please ensure any defective product identified during inspection is replaced immediately.</li> <li>Coading</li> <li>Any vertemax products subjected to loading, or used in anger, should be assessed to ensure it continues to provide the necessary protected.</li> <li>The system should then be fully inspected, any components replaced as necessary, and this installation confirmed as fit for continued use by a competent person.</li> </ul>		ixing selection
